

QUICK START-UP GUIDE

Zoom Rooms for your i3TOUCH

The Home screen on Zoom Rooms for Touch includes the controls you need to start or join a meeting, as well as access to the integrated whiteboard and access to instructions that let others in the room share their screen. If the room is associated with a calendar resource, the Home screen also includes **a list of meetings scheduled** for the room. If the meeting list includes Zoom meetings, those meetings are associated with a START button, where you can start the scheduled meeting. After you start a meeting, you also have access to the integrated meeting controller.

Whiteboard

Zoom Rooms for Touch is equipped with a whiteboard. You can start a whiteboard session, and then invite others to view and annotate or vice versa. You can save the whiteboard image and annotations at any time by sending the image file to email recipients you specify. The whiteboard control bar is displayed at the bottom of the screen, enabling you to switch from the default color (black) to another color (red, yellow, green, or blue) to draw on the screen.

Start and join a meeting

The Home screen of Zoom Rooms for Touch includes a list of any meetings scheduled for the room. If the meeting list includes Zoom meetings, those meetings are associated with a START button, where you can start a scheduled meeting. You can also start an instant meeting or join a meeting started outside of the Zoom Room.
